

# Developing Palliative Care in Primary Care

Primary Health Care is crucial to reach all in need. The World Health Organisation (WHO) Public Health model identifies 4 important requirements:

## NEXT STEPS in your country\*

1. Form national working group across disciplines
2. Identify current progress and barriers
3. Progress these 4 domains
4. Evaluate progress

Download the new **2019 Toolkit** to help you do this and contact us for encouragement at: <https://www.eapcnet.eu>
